

Programme Educational Objectives

Programme Educational Objectives of Undergraduate Programme in Instrumentation Engineering are established to address the following broad aspects:

- *“How our graduates could do best?”*
- *“How our graduates would approach problem solving, using what skills?”*
- *“What values our graduates should have?”*
- *“Why our graduates would be preferred and how can we make them stand apart?”*

Graduates of the Undergraduate Programme in Instrumentation and Control, within a first few years after graduation should be able to utilize the knowledge gained:

PEO 1: To formulate, analyze and solve problems in the field of Instrumentation and Control.

PEO 2: To achieve technical expertise and interdisciplinary approach leading to successful technical career or higher education.

PEO 3: To exhibit professionalism, ethical attitude, team work and contribute in solving the societal problems.

PEO 4: To continue to learn in an evolving world and adapt to emerging technologies.
